Re: Construction of our offices at 1250 René-Lévesque Boulevard West

Dear Michael:

I wrote to you in November 1992 to thank you and your staff for your excellent performance in the construction of our new offices on the 24th, 25th and 26th floors in this prestigious building.

We knew at the start that with a project in excess of 60,000 square feet and a very tight schedule, only a highly competent firm would be capable of doing the job, and you certainly did not disappoint us. From the beginning, your project team worked hard to get the job done in record time. Your coordination and management of the various subcontractors, together with your ability to work smoothly with our designers and consulting engineers, made it possible to get the work done quickly and well. Documentation such as schedules, minutes of meetings and change orders was detailed, accurate and timely.

Although all the work is of excellent quality and has withstood very well over the past 15 years, the millwork still stands out today as truly exceptional. The coordination, production and installation of the many and complex millwork items, including trim items, doors, conference tables and credenzas, provided the perfect finishing touch to a job well done.

As a result, you have been our contractor for the several expansions that we have had over the years, in which we added two floors and have now become the largest tenant of the building. I know you also have expanded your operations and recently moved into a new facility which I had the occasion to visit and found to be very impressive.

We congratulate your entire management team who have succeeded in positioning your company at the forefront of contractors capable of doing this exacting type of work and we wish you much success in the future.

Yours very truly,

Max R. Bernard
